Applying for An interest free Energy Efficiency Loan From The Carbon Trust

Energy Efficiency Loans from the Carbon Trust are a cost effective way to replace or upgrade your existing equipment with a more energy efficient version. This means an immediate benefit from carbon, energy and cost savings. Real World Designs can provide details of Carbon Trust interest-free loans and assist you in completing your application.

Energy Efficiency Loans from the Carbon Trust are a cost effective way to replace or upgrade your existing equipment with a more energy efficient version. This means an immediate benefit from carbon, energy and cost savings. Real World Designs can provide details of Carbon Trust interest-free loans and assist you in completing your application.

The loan covers the up front cost of the equipment and the energy savings cover the cost of the repayments. Our five year product guarantee means that savings continue after the loan is repaid.

Most Small and Medium Enterprises (SME)'s are eligible for a loan which can range from £3000 to £100,000. SME's are defined as having less than 250 Employees, a turnover of less than £40m and assets of less than £35m.

The size of the loan available is based on the annual carbon savings and defined as £1000 per 2 Tonne reduction. Real World Design can provide all the necessary documentation to support your application and assist with the process.

RESPONDALIGHT LED lamps use the latest high output solid state light emitting diodes (LED's) to produce high quality light with warm or neutral colour temperatures and are designed to be a genuine alternative to Halogen lamps .

The LED's give "instant on" light output, do not contain mercury, have a 50,000Hr life and save up to 80% in energy costs when compared to halogen.

The Lamps are also dimmable and simple to install.

The system can also add occupancy detection to reduce energy usage further.

This product may qualify for an interest-free Energy Efficient Loan from the Carbon Trust

Real World Designs are a UK based technology company developing and manufacturing high efficiency LED lighting and control systems .
